

Telephone Audio

By Media Music Now

"You Know The Feeling!"

At one time or another, nearly all of us have been on the other end of a poorly thought out IVR system, been left on hold listening to an appalling rendition of green sleeves, been directed to a non-descript answer machine or worst still been left ringing and ringing and ringing.

Your telephony system can be the first impression a potential client gets of your company. Get this wrong and you could be creating a bad first impression that may be permanent.

Using Telephone Audio brings long-term benefits to your business.

What We Do

You provide us with your script, choice of voice-over and choice of music; we take care of the whole production process. Your telephone audio is recorded, produced and delivered as professional audio, ready for immediate use on your telephone, On-hold or IVR system.

We don't provide hardware, however, should you need a telephone or IVR system we have a number of suppliers that we can personally recommend.

We are available to offer help and advice at any time before you order or at any time throughout your production.

Benefits To Your Company

'Media Music Now' brings you an excellent and inexpensive way of portraying professionalism and marketing to your customers.

- Be perceived as professional
- Add credibility to your small / medium sized company
